

QA Platform – Product Backlog & Sprint Plan

Product Backlog

ID	Epic	User Story	Priority	Points	Acceptance Criteria
US-01	Access & Identity	As a user, I want to log in/out so that I can securely access the platform.	Must Have	5	Given valid credentials, When I submit login, Then I am redirected to dashboard with session initialized.
US-02	Access & Identity	As an admin/manager, I want role-based access control so that users only see permitted data and actions.	Must Have	8	Given a manager user, When opening protected modules, Then only assigned business-unit data is returned.
US-03	Organization Setup	As an admin, I want to manage business units, activities, and as a manager i want to manage agents so that evaluation scope is structured.	Must Have	8	Given admin access, When I create/update/delete BU/activity/agent, Then records are persisted with valid relationships.
US-04	Template Management	As an admin , I want to build weighted templates (criteria/subcriteria) so that evaluations are standardized.	Must Have	13	Given a template builder form, When I define criteria and subcriteria weights, Then structure and ordering are saved correctly.
US-05	Evaluation Execution	As a manager, I want to complete manual evaluations so that agent performance is scored reliably.	Must Have	13	Given an active template, When I submit notations for each subcriteria, Then total score and detailed results are stored.
US-06	Evaluation Execution	As an admin/manager, I want to list and filter evaluations so that I can review performance by date, BU, activity, and agent.	Should Have	5	Given filter selections, When I apply filters, Then the evaluation list returns only matching and authorized records.
US-07	AI Evaluation	As a manager, I want transcription and AI-assisted scoring so that QA throughput increases.	Should Have	13	Given an uploaded audio file and template, When AI evaluation runs, Then transcript, diarization, and scored output are returned.
US-08	Reporting & Export	As an admin/manager , I want reports and exports so that QA outcomes are shareable and auditable.	Should Have	8	Given report filters, When I generate and export, Then aggregated metrics and downloadable files are produced.

Sprint Plan

Sprint	Goal	User Stories	Total Points
Sprint 1	Establish secure access control (authentication + authorization) and organizational master data.	US-01, US-02, US-03	21
Sprint 2	Deliver template-driven manual evaluation with searchable history.	US-04, US-05, US-06	31
Sprint 3	Deliver AI-assisted evaluation and business reporting/export.	US-07, US-08	21
